Step into a foreign, new world as we go on a journey into Guatemala City and discover ways of living you never thought imaginable.

I uncover how Guatemalans are adapting in 2021. This inspiring city will leave you breathless as some of the stories reveal dangerous and harsh ways of living, full of tragedy and strife. **Uncharted Destiny** is of the the first to encounter territories run by gangs and drugs. Prepare yourself to witness people who have, although overcome with poverty, adapted with ease.

“How does one stay positive?” Is a question the documentary must answer.

A true 3rd world divided, we interview Guatemalans from Mayan decent living in raveens, garbage dumps and compressed cities. Beautiful, fierce active volcanos breathe with anticipation and desperation, as do the people.

Are you ready to take a look into the current NEW NORMAL in Guatemala and also entertain the historic culture still embraced in cooking, music and more?
